REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-20 are allowed.

Claims 1, 4, 6, 8 and 14 are allowed because the prior art of record fails to disclose or suggest the inclusion of a gain profile logic circuit which maintains the gain of the VFO within a desired range when the operation of the PLL moves between frequency sub-ranges as recited in the claim 1. The closest prior art of record, US Patent No. 5,686,864, appears to have the structure which performs the recited function, i.e., in figure 4 of the present invention, the gain profile logic circuit maintains the gain by varying the capacitance values of capacitors 451 and 461, and in figure 6 the '864 reference, the VCO control circuit maintains the gain by varying the capacitance values of capacitors 604. However, the '864 specification does not explicitly mention the term "gain" in the specification as argued by the applicant. In the Appeal conference held on December 08, 2005, Mr. Hirshfeld suggested the rejection is withdrawn because the reference specification does not mention this feature.

The rest of the claims are allowed for the same reason noted in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
